Personal Statement

A committed Fullstack Software Developer graduate with robust problem-solving skills, a strong drive to see my task projects through to completion, and proven experience in creating and designing software in a test-driven environment.

Highlighted Software Applications

Counselling App - Frontend contributor, Full Stack Software Developer

September 2020

URL: <https://well-heard.herokuapp.com/>

An online web-based application that focuses on suicide prevention by offering emotional support through counsellors.

- Implemented counsellor and client authentication, client support groups, live chat between client support groups, clients being able to book appointments, and counsellors being able to reschedule the scheduled sessions if need be.
- Implemented services with Heroku deployment, PostgreSQL database models, and front-end widgets.

Neighbourhood App - Scrum Master, Full Stack Software Developer

August 2020

URL: <https://hood40.herokuapp.com/>

A neighbourhood application that enables users to know signup and be able to view different neighbourhoods. A user can join or even leave a neighbourhood, once they have joined, they can view information about that neighbourhood.

- Implemented user authentication system so that only authenticated users can view and join a neighbourhood.
- Implemented user-friendly UI, focusing on simplicity and structure principles.
